

Two independent controls for two traction motors (D.C. series excited) are fitted in the same package. This controller is suitable to be used for medium and large twin motor electric vehicles (front trucks), with traction motors up to 4.5 kW each. General features: MOSFET technology, microprocessor logic, faults memory, digital programming via console, regenerative braking.

Technical details

Supply voltage: 24 ÷ 48V

Maximum current: 330 + 330A

High Frequency: 16 kHz

Electronic differential

Internal hour meter

Internal Battery Discharge Indicator (BDI)

Serial link

Protection IP54

Dimensions: 150 X 455 X 87 mm
