

## EPS ACW CB steering system

Integrated Plug & Play steering system available in CB (counterbalanced) and Warehouse configuration. The integration between the electronic controller and the steering mechanics permit an easier installation with associated cost reduction.

Due to the dual microcontroller architecture both connected to CAN bus it fulfills the Category 3 of EN954-1 and EN/ISO13849-1 also in applications with steering command via CAN bus.

### Technical details

- Absolute and redundant contactless sensors onboard.
- High power saving compared to hydraulic version.
- Less noisy then hydraulic version.
