

EPS ACW warehouse steering system

Integrated Plug & Play steering system available in CB (counterbalanced) and Warehouse configuration. The integration between the electronic controller and the steering mechanics permit an easier installation with associated cost reduction.

Due to the dual microcontroller architecture both connected to CAN bus it fulfills the Category 3 of EN954-1 and EN/ISO13849-1 also in applications with steering command via CAN bus.

Technical details

- Wide range of command sensors (stepper motor, twinpot, double PWM, double encoder).
- Wire Guidance compatible.
