

Triplo controller

Technical details:

Supply voltage: 24 ÷ 48V

Maximum current:

traction 330A + 330A + lifting 350A

High Frequency: 16 kHz

CanBus (connection to Sycos)

Electronic differential

Inputs: 7 on/off and 2 analog

Outputs: 2 (2A)

Serial link to handset of MDI

Complies with European CE Standards

IP54 protection level
